Art Unit: 3727

1. Claims 4, and 12-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention. Applicant elected without traverse.

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the multiple layers in claim 9 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. Claims 1, and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim recites the member being affixed in at least two locations. However, the disclosure only shows two locations, NOT at least two locations as claimed.

Regarding claim 6, the claim is confusing. The claim recites the member is mounted at least two spaced locations and then again recites that the member is mounted along a center line. It seems the claims recites the member is mounted in two spaced location and then further mounted along the centerline.

4. Claims 1-3, 6-8, 10, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Kulka (3125215). Kulka teaches a package having a box including a top portion col. 3, ln. 38., and a member affixed to the box and configured to retain the necktie as claimed and being mounted in at least two spaced locations.

Regarding claim 6, note the attachment points in Figs. 5 is along a center line (between the two corners) as claimed.

Regarding claim 8, the box in Kulka inherently has a first color as claimed.

5. Claims 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kulka in view of Sanchez (5197661) or Hallam (5383595). It would have been obvious to one of ordinary skill in the art to provide to provide at least one of a fabric exterior and interior layer for a container with matching color as taught by Sanchez to provide attractiveness.

Hallam also teaches that it is known in the art provide a container with fabric covering (col. 3, ln. 15). It would have been obvious to one of ordinary skill in the art to provide to provide a fabric covering to provide added attractive ness. With respect to matching color of the fabric and the tie, it is noted that the tie is not being claimed, thus impart no structure over the container of Kulka in view of Hallam.

Art Unit: 3727

6. Claims 1-3, 5, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Ikemoto (5699904). Ikemoto teaches a package for tie having a member affixed to the box at least two spaced locations within the box.

7. Claims 1-3, 5-7, 10, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Seynhaeve (5014830). Seynhaeve teaches a package with elastic members 14.

8. Claims 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Seynhaeve. Official Notice is taken that it is known in the art to provide a fabric exterior or lining in Seynhaeve. It would have been obvious to one of ordinary skill in the art to provide an fabric exterior or lining to provide added protection. Furthermore, It would have been obvious to one of ordinary skill in the art provide matching color with an article of cloth as set forth.
